bibliotheca selfCheck™ Components

A complete set of selfCheck™ components that can be embedded within existing furniture

selfCheck™ Components
RFID

hybrid selfCheck™ Components
Tattle-Tape™ & RFID

Integrate into library furniture for a unique look

Provided as a kit of components, this solution can be integrated within almost any piece of furniture to create a completely unique selfCheck™ experience that matches with the look and feel of your library.

Provide an enjoyable self-service experience

Allow your patrons to quickly process multiple items at a time (using RFID), manage their account, receive a record of all their transactions, and even unlock media cases and pay fines & fees.

Quickly process transactions

Our RFID and hybrid components operate at the fastest speeds possible to ensure your patrons are able to quickly process their transaction and get on with their day.

You choose the technology

Our flexible solution can be configured to your exact specifications, allowing self-service operation in barcode, RFID or hybrid mode.

bibliotheca® + 3M

the best of both worlds
